

# Private Vibe Coding with Fundamentals Mentorship

**Durasi:** 4 minggu  
**Sesi:** 8 sesi × 2 jam  
**Bentuk:** 1-on-1 mentorship

**Mentor:** Yitzhak Edmund Tio Manalu – CEO of ArachnoVa  
**Web:** <https://www.arachnova.id> | [instagram.com/arachnova.id](https://www.instagram.com/arachnova.id)

**Stack:** Vite + TailwindCSS (FE) | Express JS (BE) | MongoDB (DB) | Resend (Email) | JWT (Auth) | Midtrans (Payments)  
**Tarif: Rp100.000/jam** (× 16 jam = Rp1.600.000 total)

| Sesi | Judul                       | Points                                                                                                                                                                                                                                                                                              | Output                                                                 |
|------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| 1    | Introduction to Vibe Coding | <ul style="list-style-type: none"><li>• Perbandingan Campus vs Proyek vs Vibe Code</li><li>• Sejarah perkembangan software development</li><li>• OpenCode + PromptAudit setup</li><li>• Zero-level vanilla stack (HTML/CSS/JS, JS backend, SQLite)</li><li>• Deploy ke Netlify via GitHub</li></ul> | <b>Website vanilla pertama live di Netlify.</b>                        |
| 2    | The Prompt Architect        | <ul style="list-style-type: none"><li>• Sejarah AI: expert systems ke LLM</li><li>• Context management (MCPs, Skills, Markdowns)</li><li>• SDLC &amp; Blackbox Development</li><li>• Clean code, clean repo (hapus debris, dedup)</li><li>• Fork 2 project dari 1 repo, deploy keduanya</li></ul>   | <b>2 project terdeploy dari 1 repo (Netlify).</b>                      |
| 3    | Do Not Reinvent the Wheel   | <ul style="list-style-type: none"><li>• Kenapa framework dan library ada</li><li>• Plus minus berbagai bahasa pemrograman</li><li>• Vite + TailwindCSS + Express + MongoDB</li><li>• Selesaikan beginner dev track</li><li>• Deploy app berbasis framework</li></ul>                                | <b>Website framework pertama live (Vite+Tailwind+Express+MongoDB).</b> |
| 4    | The Truth Is in the Logs    | <ul style="list-style-type: none"><li>• pino structured logging</li><li>• Break case: buat bug sengaja, trace dan fix</li><li>• Analytics: Plausible/GA</li><li>• Business case: simulasi visitor</li><li>• Log viewer + analytics dashboard</li></ul>                                              | <b>Log viewer + analytics dashboard live.</b>                          |
| 5    | Show Me the Money           | <ul style="list-style-type: none"><li>• Booking form + date picker + service selector</li><li>• Payment gateway: Midtrans (test mode)</li><li>• Webhook + email receipt via Resend</li><li>• Break case: webhook failure</li><li>• Conversion event tracking</li></ul>                              | <b>Booking + payment flow live (Midtrans test mode).</b>               |
| 6    | Who Goes There?             | <ul style="list-style-type: none"><li>• JWT authentication (register, login, logout)</li><li>• Admin dashboard + role-based access</li><li>• Email notifications on status change</li><li>• Cookie consent + privacy compliance</li><li>• Break case: role leak</li></ul>                           | <b>Admin dashboard dengan login multi-role live.</b>                   |
| 7    | Ready for the Wild          | <ul style="list-style-type: none"><li>• SEO meta tags + Open Graph + sitemap</li><li>• Image optimization + CDN + Lighthouse audit</li><li>• Rate limiting + input validation + CORS</li><li>• Cookie consent banner + privacy page</li><li>• Break case: mixed content warning</li></ul>           | <b>Site production-ready: HTTPS + SEO + CDN + privacy compliance.</b>  |
| 8    | No More Training Wheels     | <ul style="list-style-type: none"><li>• Solo free build (mentor nonton diam)</li><li>• PromptAudit graduation review</li><li>• Community showcase</li><li>• Scale handoff conversation</li></ul>                                                                                                    | <b>Fitur baru dibangun &amp; dideploy sendiri.</b>                     |

**Total: 8 sesi × 2 jam = 16 jam | Rp1.600.000**

Setiap sesi: Konsep → BUILD via prompt → BACA kode → Error tracing → Commit & Push. PromptAudit aktif dari Hari 1.
