

GenZCY – Build With Vibe

4 minggu | 8 sesi × 2 jam | 1-on-1 mentorship

Program privat untuk pemilik bisnis. Anda tidak belajar coding. Anda belajar mengarstiektur website dan mengarahkan AI untuk membangunnya. Setiap sesi menghasilkan kode nyata.

Stack: Vite + TailwindCSS (FE) | Express JS (BE) | MongoDB (DB) | Resend (Email) | JWT (Auth) | Midtrans/Stripe (Payments)

Tarif: Rp100.000/jam (× 16 jam = Rp1.600.000 total)

Sesi	Judul	Points	Output
1	Introduction to Vibe Coding Responsibly	Perbandingan Campus vs Praktek vs Vibe Code. Sejarah development. OpenCode + PromptAudit. Zero-level vanilla (HTML/CSS/JS, JS backend, SQLite). Deploy ke Netlify via GitHub.	Website vanilla pertama live di Netlify. Paham perbedaan 3 jalur karir. PromptAudit aktif.
2	The Prompt Architect	Sejarah AI: expert systems ke LLM. Manajemen konteks (MCPs, Skills, Markdowns). SDLC & Blackbox Dev. Clean code, clean repo. Fork 2 project, deploy keduanya.	2 project terdeploy dari 1 repo. Paham cara kelola konteks AI. Kode bersih tanpa debris.
3	Do Not Reinvent The Wheels	Kenapa framework ada. Vite + TailwindCSS + Express + MongoDB. Selesaikan beginner track. Deploy app berbasis framework.	Website framework pertama live. Paham kapan pakai framework vs vanilla.
4	Trust, But Verify	pino structured logging. Break case: bug sengaja, trace dan fix. Analytics (Plausible/GA). Business case: simulasi visitor. Log viewer + analytics dashboard.	Logging & analytics terpasang. Bisa jawab: "apa yang terjadi?" (logs) + "apa yang pelanggan lakukan?" (analytics).
5	From Click to Cash	Booking form + payment gateway (Midtrans/Stripe). Webhook + email receipt. Break case: webhook failure.	Booking + payment end-to-end bekerja. Bisa debug webhook failure dari logs.
6	Know Thy Customer	JWT auth + admin dashboard + roles. Email notifications. Break case: role leak.	Login + dashboard + role-based access bekerja. Bisa debug auth error dari logs.
7	Ready, Set, Ship	SEO + Open Graph + CDN + rate limiting + cookie consent + privacy page. Break case: mixed content warning.	Site production-ready. HTTPS, SEO, privacy compliance. Bisa debug mixed content.
8	Full Circle	Solo free build. PromptAudit graduation review. Community showcase. Scale handoff.	Fitur baru dibangun & dideploy sendiri. Bergabung network owner. Paham escalation path.

Total: 8 sesi × 2 jam = 16 jam | Rp1.600.000

Setiap sesi: Konsep → BUILD via prompt → BACA kode → Error tracing → Commit & Push. PromptAudit aktif dari Hari 1.
