

Private Vibe Coding with Fundamentals Mentorship

Durasi: 4 minggu
Sesi: 8 sesi × 2 jam
Bentuk: 1-on-1 mentorship

Mentor: Yitzhak Edmund Tio Manalu – CEO of ArachnoVa
Sites: <https://www.arachnova.id> | <https://www.instagram.com/arachnova.id>

Stack: Vite + TailwindCSS (FE) | Express JS (BE) | MongoDB (DB) | Resend (Email) | JWT (Auth) | Midtrans (Payments)
Tarif: Rp100.000/jam (× 16 jam = Rp1.600.000 total)

Sesi	Judul	Points	Output
1	Introduction to Vibe Coding	• Perbandingan Campus vs Proyek vs Vibe Code • Before & After Vibe Coding • OpenCode + tooling setup • Zero-level vanilla stack (HTML/CSS/JS, JS backend, SQLite) • Deploy ke Netlify via GitHub	Website vanilla pertama live di Netlify.
2	The Prompt Architect	• Konsep AI: expert systems ke LLM • Context management (MCPs, Skills, Markdowns) • SDLC & Blackbox Development • Clean code, clean repo (hapus debris, dedup) • Fork 2 project dari 1 repo, deploy keduanya	2 project terdeploy dari 1 repo.
3	Do Not Reinvent the Wheel	• Kenapa framework dan library ada • Plus minus berbagai bahasa pemrograman • Vite + TailwindCSS + Express + MongoDB • Selesaikan beginner dev track • Deploy app berbasis framework (Railway/Vercel)	Website framework pertama live (Vite+Tailwind+Express+MongoDB).
4	The Truth Is in the Logs	• Cara log di frontend (console, network) • Cara log di backend (server log per request) • Cara log di server (error log, access log) • Business case: simulasikan pengunjung, lihat data real-time • Log viewer sederhana di admin area	Log viewer + analytics dashboard live.
5	Show Me the Money	• Booking form + date picker + service selector • Payment gateway: Midtrans (test mode) • Webhook + email receipt via Resend • Conversion event tracking	Booking + payment flow live (Midtrans test mode).
6	Who Goes There?	• JWT authentication (register, login, logout) • Admin dashboard + role-based access • Email notifications on status change	Admin dashboard dengan login multi-role live.
7	Ready for the Wild	• SEO meta tags + Open Graph + sitemap • Structured data (JSON-LD) agar dipahami Google & AI Agents • Image optimization + CDN + Lighthouse audit • Rate limiting + input validation + CORS • Bukti SEO bekerja: Google Rich Results Test, tanya ChatGPT/Claude tentang bisnis Anda, cek hasilnya akurat	Site production-ready: SEO + CDN + security hardening.
8	No More Training Wheels	• Pilih satu fitur dari business needs list • Bangun & deploy fitur tersebut secara mandiri • Community showcase — presentasi ke network owner • Scale handoff conversation	Fitur baru dibangun & dideploy sendiri.

Deployment: Sesi 1-2: Netlify (static). Sesi 3-8: Railway/Vercel (full-stack).

Track Levels:
Zero: Paham konsep website, bisa deploy static site, tau git.
Beginner: Paham database, API, CRUD, framework. Bisa build & deploy full-stack app.
Junior: Paham auth, payment, logging, SEO, security. Bisa ship production-ready.
